AMENDMENTS

In the claims:

Pursuant to 37 C.F.R. §1.121 the following is a complete listing of the claims of the present application:

- 1-33. (canceled)
- 34. (currently amended) A method to identify a specific binding partner compound of a phosphodiesterase polypeptide encoded by a polynucleotide selected from the group consisting of:
- ii) a polynucleotide that hybridizes under moderately stringent conditions to the non-eoding strand of the polynucleotide of (i); said moderately stringent conditions comprising a final wash at 65° C in 2X SSC and 0.1%SDS,
- said method comprising the steps of:
- a) contacting the phosphodiesterase polypeptide with a compound under conditions which permit binding between the compound and the phosphodiesterase polypeptide;
 - b) detecting binding of the compound to the phosphodiesterase polypeptide; and
- c) identifying the compound as a specific binding partner of the phosphodiesterase polypeptide.
- 35. (previously presented) The method according to claim 34 wherein the specific binding partner modulates activity of the phosphodiesterase polypeptide.
- 36. (previously presented) The method according to claim 35 wherein the compound inhibits activity of the phosphodiesterase polypeptide.
- 37. (previously presented) The method according to claim 35 wherein the compound enhances activity of the phosphodiesterase polypeptide.
